REASONS FOR ALLOWANCE

1. Claims 1, 6-7 and 9-10 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 11, 13-20, directed to the process of using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 11, 13-20 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper No. 5 is hereby withdrawn.

2. The following is an examiner's statement of reasons for allowance:

Applicants addition of casting solvent being selected from the group consisting of gamma-butyrolactone, cyclopentanone, propylene glycol methyl ether acetate, cyclohexanone and methyl ethyl ketone to all of the composition and process claims limits the choice of casting solvent to one which is unobvious in view of the art of record, i.e. Janke et al (5,726,216) in view of applicants' disclosure of well know prior art on page 2 of their specification and Schrader (4,474,929) and Gelorme et al (4,882,245). Applicant's arguments with respect to the lack of motivation to make the combination of components without this casting solvent limitation are moot in view of no such claims being present in the application. There is no clear motivation in Janke et al to use any of the listed solvents with the mixtures they set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
